🧠 PROFESSIONAL SUMMARY

Microsoft technology specialist with 2+ years of experience designing and delivering custom CRM and automation solutions using Dynamics 365, Power Platform (Power Apps, Power Automate), and Azure Data Factory. Successfully led the development of modules for lead and opportunity tracking, as well as a field operations app for a hotel chain's hunting service, improving workflow efficiency and automating stock reporting. Skilled in creating C# plugins, advanced JavaScript customizations, and responsive front-end tools to enhance business processes and user experience. Proven ability to align technical execution with operational goals in cross-functional environments.

💼 WORK EXPERIENCE

Cedi Tech Consulting - *Consultant and Developer*
